¹Prescriptions are issued only when clinically appropriate. No controlled substances may be prescribed and the availability of other prescriptions may be restricted by law. ²For Pediatric Care patients, a parent or guardian must be identified during the initial registration, and available to participate in consultations involving minors under 18.

MDLIVE is an Internet-based service that allows consumers to select and interact with independent physicians and other health care providers. MDLIVE is not a health care provider or a health insurance. MDLIVE is not intended to address emergency or life-threatening medical conditions and should not be used in those circumstances. Your Provider will assess whether MDLIVE is appropriate for your stated medical conditions.

FLU SEASON
IS HERE!

Do you know you have 24/7/365 access to board-certified doctors and pediatricians?

Fight the Flu!

Now that the seasons are changing, it's time to start thinking about protecting yourself and your family from the flu.

Getting a flu shot is the best way to prevent and protect you against the flu.

Keep germs at bay by not touching common areas unless required, washing your hands often, and keeping your hands away from your face.

If you have the flu, try staying at home and get plenty of rest. A sick person is most likely to spread flu when she/he has a fever, or during the first five days of getting sick.

MDLIVE FLU HOTLINE: 866-972-1232

Do you want to learn more about flu prevention, flu symptoms and areas of the United States that are experiencing high levels of flu outbreaks?

Simply call our toll-free flu hotline, 866-972-1232, for information and resources.
